Art Unit: 2824

#### **DETAILED ACTION**

- 1. The Preliminary Amendment filed on April 15, 2002 is acknowledged.
- This office action is in response to applicant's amendments filed on August 29,
   and September 09, 2003.
- 3. Claims 1-33 and 37-40 are presented for examination.

# Specification

- 4. The abstract of the disclosure is objected to because **the abstract exceed 150** words. Correction is required. See MPEP § 608.01(b).
- 5. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

### Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 7. Claims 37-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Wong (US 6,134,141).

Art Unit: 2824

Wong discloses in figures 2 and 5, a memory device having an array of memory cells (130) arranged in rows and columns (see col. 3, lines 36-37), the memory cells being hot electron injection memory cells or split gate memory cells (see col. 3, lines 2-3 and col. 4, lines 55-57); a first bias circuit (220) including a current source and a first bias transistor (227), the first bias circuit generating a bias current (Vvfy); and a second bias circuit comprising a plurality of bias current sources (242), each bias current source coupled to the first bias transistor (227) and to a corresponding memory cell and mirroring the bias current (see figs. 2 and 5).

## Allowable Subject Matter

- 8. Claims 1-33 are allowable over the art of record.
- 9. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not teach or suggest a memory device or a distributed current network having a local bias circuit generating a plurality of bias currents in response to a corresponding one of a plurality of first bias currents which are generated from a global bias circuit as recited in the independent claims 1, 22 and 31.

#### Conclusion

- 10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Pasotti et al. (US 2002/0196664 A1), Bergemont et al. (US 6,606,265), Quader et al. (6,396,757), Tran et al. (US 6,282,145) disclose a memory device similar to that of Wong.
- 11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Toan Le whose telephone number is (703) 305-4852. The examiner can normally be reached on M-F (8.00AM 5.30PM).

Application/Control Number: 10/044,821

Art Unit: 2824

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Elms can be reached on (703) 308-2816. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
